Tube Talk

Penta Labs is pleased to revive an old tradition through a new medium. If you've been a customer for years, then you've probably experienced the Penta newsletter Tube Talk. Begun in 1999, published in both English and Spanish, Tube Talk was Penta's very own print newsletter. It followed everything from the lives of those who worked at Penta, to the racing exploits of the owner, to the launch of new products. If you've never heard of Tube Talk, but are interested in looking through our old archives, click [here](#) for copies online.

New MG5193

Penta is proud to announce the arrival of the PM5193/MG5193 pulse magnetron. The PM5193/MG5193 is a mechanically tunable pulse magnetron designed for use in linear accelerators and medical linac applications.

The PM5193 is equivalent to the MG5193 in fit, form, and function. All equipment designed for the MG5193 will function perfectly with the PM5193 without any adjustment or modification. Click [here](#) to get a quote.
